

# RAILCAR SERVICES

Reliable, Safe Railcar Services Delivered by the Most Qualified Team in the Industry

## EXPERIENCE MATTERS

The Aaron Oil team has delivered professional Railcar cleaning services for nearly 40 years. We are committed to best-in-class service, safety and regulatory compliance with a priority on reclamation and recycling.

The Rail industry trusts our team's expertise due to our unique training qualifications, service capabilities, as well as our focus on product reclamation and sustainable waste recycling.

## REDUCED LIABILITY

Reducing regulatory compliance liability is a priority for most waste generators and the Rail industry is no different. Aaron Oil's Railcar cleaning process provides the safest and most environmentally sustainable methods and technologies available today.

For example, most all washwater fluids are recovered and processed through our water treatment system at our Saraland, AL facility.

The Aaron Oil team utilizes high-speed automated, proprietary cleaning and blasting technologies. This technology provides the best quality cleaning while requiring less manned-entry resulting in increased safety. Safer conditions for our team, sustainable for the environment - reduced liability for everyone.

## Railcar Mobile Wash Trailer
